The Soundex for the 1910 Census for the State of Oregon

All rights reserved to this work by the Genealogical Forum of Oregon, Inc.
2130 S. W. Fifth Avenue, Suite 220, Portland, Oregon 97201-4934
June 10, 1997

Abstracted and compiled by members of the Genealogical Forum of Oregon with the assistance of many individuals and Genealogical Societies in the State of Oregon.

The abstraction was made from National Archive films T624, rolls 1278 through 1291. The forms were patterned after the 1900 Soundex Cards produced for the Census Bureau by the WPA, and are intended to provide a finding aid for genealogists and other researchers. The data was abstracted by many people, from the work of other human beings that appeared on the film, so are to be regarded as a guide, though many steps in proofreading were taken to ensure accuracy. The user of this Soundex style guide is urged to think of possibilities of various spellings and search accordingly.

The following is from The 1910 Federal Population Census National Archives Trust Fund Board - Washington, DC, 1982 - a catalog.

Appendix I -Guide to the Soundex Code

The Soundex filing system, alphabetic for the first letter of surname and numeric thereunder as indicated by divider cards, keeps together names of the same and similar sounds but of variant spellings.

To search for a particular name, you must first work out the code number for the surname of the individual. No number is assigned to the first letter of the surname. If the name is Kuhne, for example the index card will be in the "K" segment of the index. The code number for Kuhne, worked out according to the system below is 500.

Soundex Coding Guide

Code	Key Letter and Equivalents
1	b,p,f,v
2	c,s,k,g,j,q,x,z
3	d,t
4	l
5	m,n
6	r

The letters a, e, i, o, u, y, w, and h are *not* coded.
The first letter of a surname is *not* coded.

Every Soundex number must be a 3-digit number. A name yielding no code numbers, as Lee, would thus have to be L000; one yielding only one code number would have two zeros added , such as Kuhne, coded as K500; and one yielding two code numbers would have two zeros added, as Ebell, coded as E140. Not more than three digits are used, so Ebelson would be coded as L142; not E1425.

When two key letters or equivalents appear together, or one key letter immediately follows or precedes as equivalent, the two are coded as one letter, by a single number, as follows: Ke*l l*y coded as K400; Buer*ck* coded as B620; *L l*oyd, coded as L300 and S*ch*aefer, coded as S160. Scott would be S300; Jackson J250.

If several surnames have the same code, the cards for them are arranged alphabetically by given name There are divider cards showing most code numbers, but not all. For instance, one divider may be numbered 350 and the next one 400.

Such prefixes to surnames as "van", "Von", "Di", "de" "le", "D", "dela" or "du" are sometimes disregarded in alphabetizing and coding. Researchers are advised to check all possible spellings of a name.

The following names are examples of Soundex coding and are given only as illustrations.

Native American, Orientals, and Religious Nuns

Researchers using the Soundex system to locate religious nuns or persons with American Indian or oriental names should be aware of the way such names were coded. Variations in coding differed from the normal coding system.

Phonetically spelled oriental and Indian names were sometimes coded as if one continuous name, or if a distinguishable surname was given, the names were coded in the normal manner. For example the American Indian name Shinka-Wa-Sa may have been coded as "Shinka" S 520 or Sa (S000). Lee Wan Bow may be found under L 000 or L 510. Researchers should investigate the various possibilities of coding such names.

Religious nun names were coded as if "Sister" was their surname if no surname was given. So Sister Mary Boniface would be coded "S236". but Sister Mary Boniface Moran would be found under M 650 for Moran.

The names of state were abbreviated in the fashion of the modern postal state designations; names of countries are written in total. Other abbreviations used by the census enumerators can be found in Appendix II of the various National Archives' Federal Population Census Catalog

Expression of Appreciation is given to all the members of the Genealogical Forum of Oregon, Inc. who worked on this project over an eleven year period and to the following individuals and Genealogical Societies.

The Soundex for the 1910 Census for the State of Oregon

All rights reserved to this work by the Genealogical Forum of Oregon, Inc.
2130 S. W. Fifth Avenue, Suite 220, Portland, Oregon 97201-4934

Abstracted and compiled by members of the Genealogical Forum of Oregon with the assistance of many individuals and Genealogical Societies in the State of Oregon.

Addendum

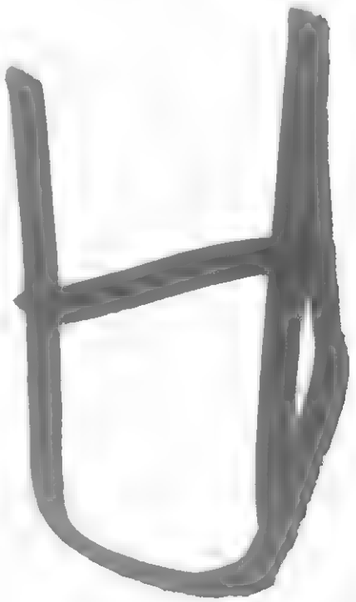

March 1, 1998

The following cards are cards found misfiled as the filming took place.
These cards are placed in Soundex Order and have been placed on the end of the film project as an addendum.
The committee apologizes for the inconvenience caused by the misfiling. Multiple inspections, sorting and arranging has not produced an error free product. It is hoped that users will make use of this Soundex effort, and realize that it was produced by human hands, with the best intentions at heart.

The abstraction was made from National Archive films T624, rolls 1278 through 1291. The forms were patterned after the 1900 Soundex Cards produced for the Census Bureau by the WPA, and are intended to provide a finding aid for genealogists and other researchers. The data was abstracted by many people, from the work of other human beings that appeared on the film, so are to be regarded as a guide, though many steps in proofreading were taken to ensure accuracy. The user of this Soundex style guide is urged to think of possibilities of various spellings and search accordingly.

Expression of Appreciation is given to all the members of the Genealogical Forum of Oregon, Inc. who worked on this project over an eleven year period and to the following individuals and Genealogical Societies.
